A More Connected Data Future

Turning Data into
Brighter Possibilities

1. The Data Challenge

Organizations today work with multiple tools and data sources, which leads to complexity, data silos and higher costs.

Common Challenges

- **MP** Multiple platforms
- **DS** Data silos
- **CM** Complex management
- **$** Higher costs
- **TC** Limited collaboration

What if you could bring everything together in one unified platform?

That's Microsoft Fabric!

3. OneLake – The Heart of Fabric

OneLake is a unified, logical data lake that serves as the central storage for all data in Microsoft Fabric.

1. **Structured Data**
2. **Semi-structured Data**
3. **Unstructured Data**
4. **Streaming Data**
5. **Business Applications**

OneLake

One place for all your data

1. **Single source of truth**
2. **No data duplication**
3. **Seamless sharing across teams**
4. **Supports all data types**
5. **Enterprise-grade security**

OneLake Your Data. Without Limits.

Store | Share | Govern | Analyze

4. Data Flow in Microsoft Fabric

From data ingestion to business insights – all within one platform.

1. Ingest	2. Transform	3. Store	4. Analyze	5. Visualize
1	2	3	4	5
Data Factory	**Data Engineering**	**Lakehouse (OneLake)**	**Data Warehouse**	**Power BI**
Connect and ingest data from multiple sources	Transform and process data using Spark	Store data in open and performant format	Run analytics on structured data	Create interactive dashboards and share insights

A Seamless Analytics Journey

1. **Any Data**
2. **One Platform**
3. **Real Insights**
4. **Better Decisions**

5. Real-World Use Cases & Benefits

Microsoft Fabric helps organizations across industries unlock the power of their data.

Real-World Use Cases

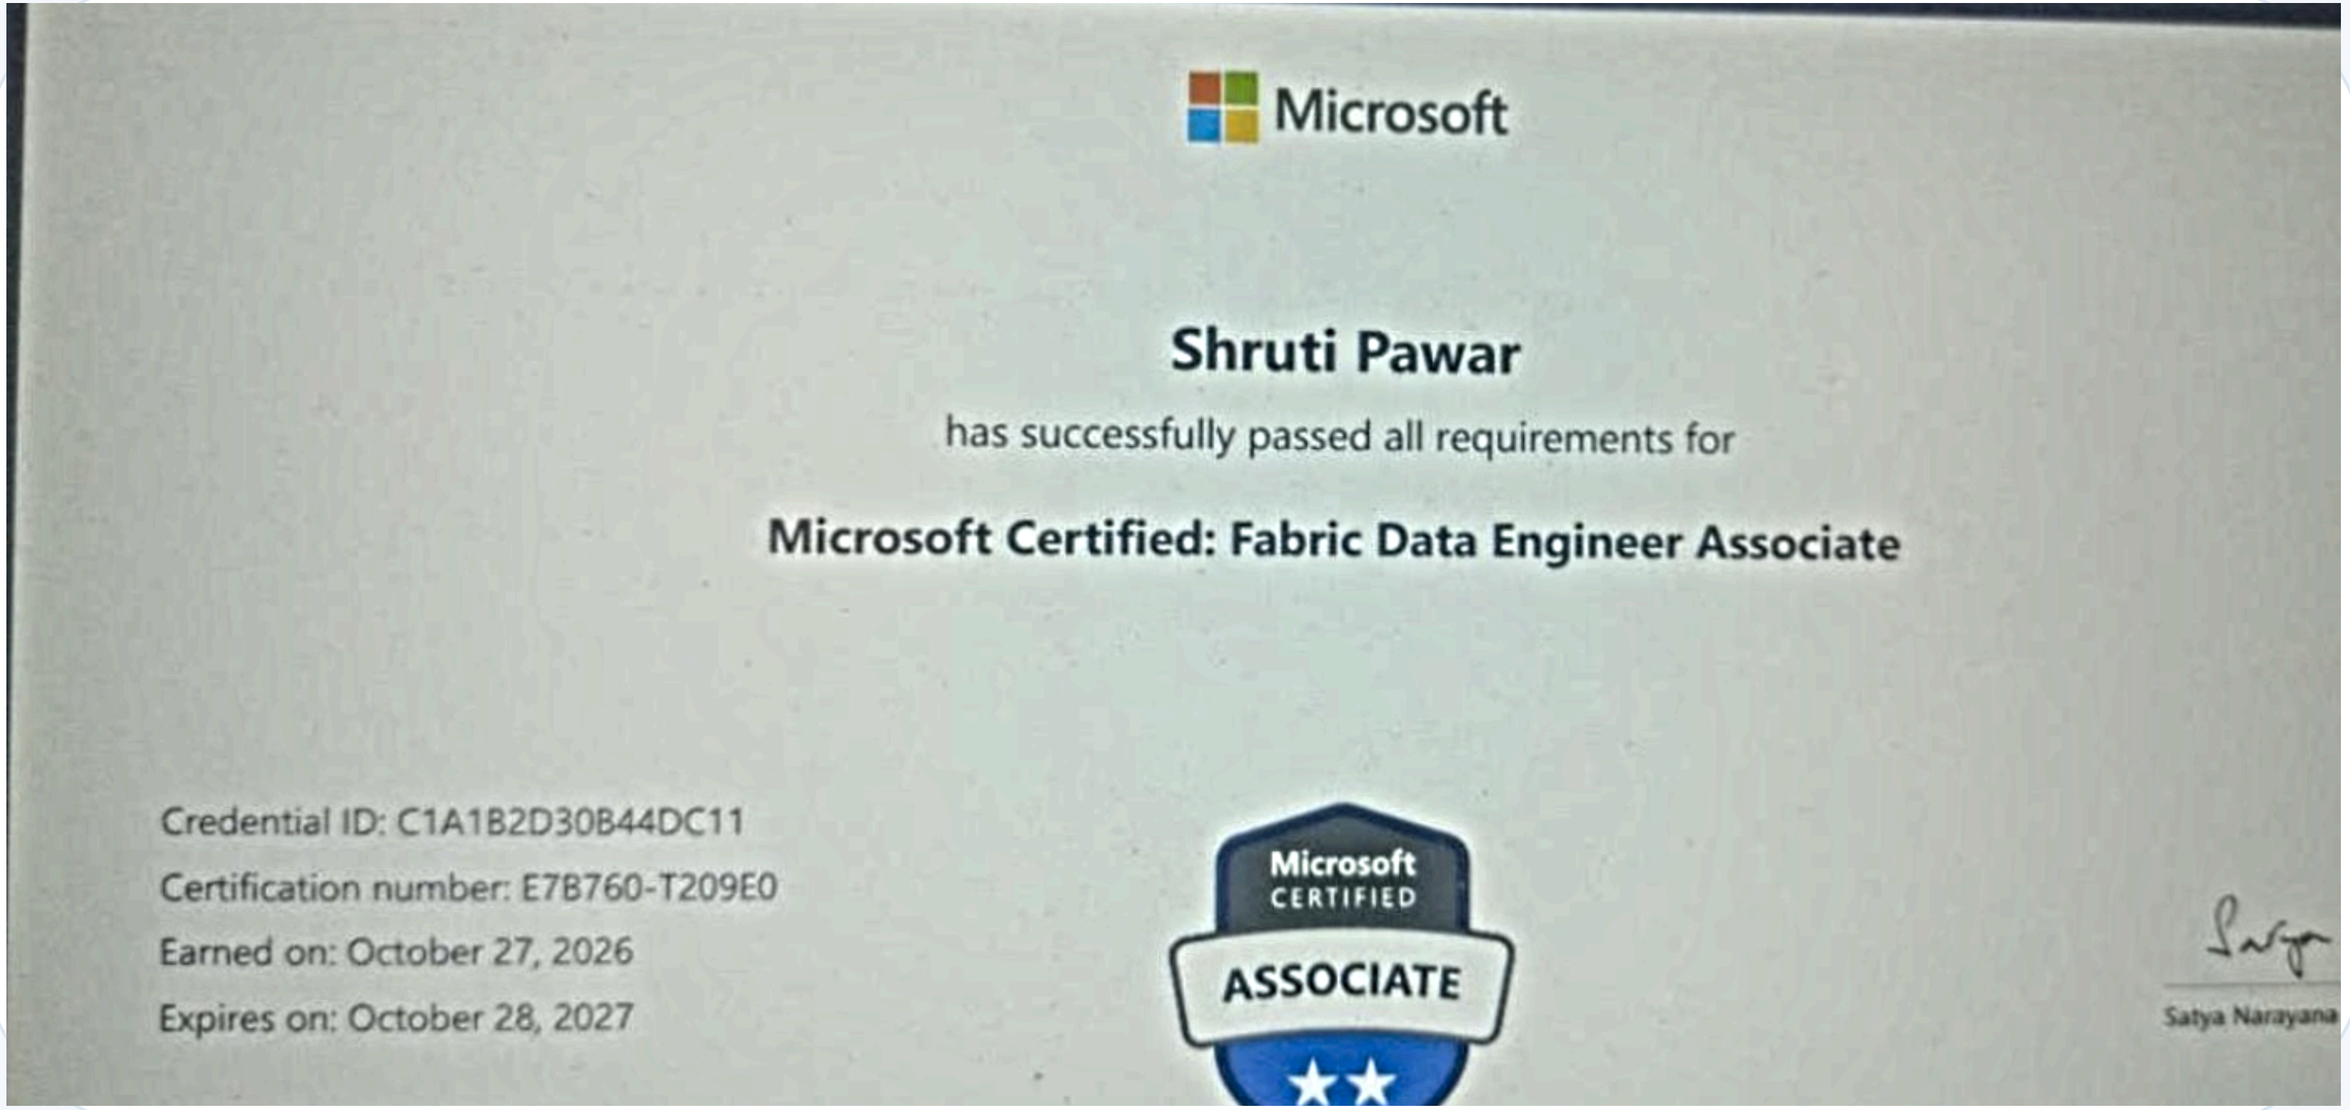

1. **Sales & Marketing**
   Customer insights & campaign analytics
2. **Finance**
   Financial reporting & forecasting
3. **Operations**
   Supply chain & operational analytics
4. **Human Resources**
   Workforce analytics
5. **Product & Engineering**
   Product usage and telemetry analytics

Benefits

1. **Unified Platform**
   Reduce complexity and costs.
2. **Faster Time to Insights**
   Make data-driven decisions.
3. **Scalability**
   Grow easily with your data.
4. **Better Collaboration**
   One data, many teams.
5. **AI Integration**
   Ready for the next generation.
6. **Secure & Governed**
   Enterprise-grade security.

Empowering Organizations to Achieve More with Their Data

Microsoft Certified: Fabric Data Engineer Associate

Thank You

Microsoft Fabric • One Platform • Endless Possibilities
